

AT A GLANCE

- CyberRx is a cybersecurity health measurement and analytical tool that allows companies to assess their cybersecurity readiness and resilience against 96 best practices in the NIST Cybersecurity Framework.
- CyberRx exposes companies' capabilities to identify, protect, detect, respond, and recover from cybersecurity events.
- CyberRx provides organizations with an approach for continuous cybersecurity risk management and a path to improve their overall cybersecurity readiness.

KEY BENEFITS

- Become more knowledgeable about your organization's cybersecurity threats and risks.
- Be better informed about your organization's cybersecurity capabilities.
- Measure your level of readiness to prevent a cybersecurity breach.
- Assess financial liability that may be exposed by a successful cybersecurity attack.
- Have greater confidence and control to prioritize and determine where to invest cybersecurity resources.
- Reduce legal risk with evidence of good faith efforts to manage cybersecurity risks.
- Enable quick response to audits, compliance reviews and other cybersecurity assessments.
- Fully support the NIST Cybersecurity Framework, NIST 800-53 Rev4, NIST 800-30, HIPAA security controls and other industry standards.

SUBSCRIPTION OVERVIEW

The CyberRx subscription packages include:

- Access to best practice assessment tools, cybersecurity procedures, templates, enhancements, technical assistance support, expert analysis, CyberRx reports and latest features.
- Annual subscription options with one-time or monthly payment plans.
- Discounts for add-on services (based on subscription package selected).

To get started with your CyberRx subscription, please contact us at MCGlobalTech.com or call us **202.355.9448 (Ext. 200)**.
